

Assignment (Due Feb 6 before noon)

- Write a program that defines a Rectangle object, and then the program can accept user's inputs to change its location and size, after it is resized, output its new location, new size, and then compute and output its area.
- Write a program that prompts for and accepts a telephone number in the form "dddddddd", and then output the new telephone number in the form of "+0852(dddd)dddd". For example, if you input 26098045, the output should be +0852(2609)8045
- Write a program that prompts for and accepts a date in the form of "day/month/year" and output in the form of "month, day, year". For example, if you input "30/January/2007", the output should be like:
The input is "30/January/2007", the output is "January, 30, 2007".
